

Sinclair uses the public airwaves free of charge and is obligated by law to serve the public interest. To present 30 year old clips, spun to distortion, is not news. It is blatantly political propaganda intended to influence the election, especially coming so close to the election.

Sinclair's decision to force their stations to air this anti-Kerry documentary days before the election shows why media consolidation is dangerous. Sinclair's actions need to be considered in the license renewal process. Thank you.
